Industry Based Software Engineering Project – Interim Report (IT2992 Group Project)

The Interim Report (weighting: 10%)

Deadline:

A SUMMATIVE assessment.

This will be an interim report, containing the aims, objectives, a summary of key literature sources and details of work carried out to date, and planned work to be carried out.

The word count is expected to be approximately 2,000 words. **Full details** are provided in here.

The Interim Report Pro-forma is available in the Industry Based Software Engineering Project – Interim Report (IT2992 Group Project) and is to be submitted via LMS.

Interim Report

The Interim Report is to be written in a professional style and should contain the following contents:

Part A:
> **Title page** containing. Your student Number, Student name, Course, Supervisor's Name and Title of the project.
>
> Contents page.

Part B:
> **Academic Question(s), Aim(s) and Objectives** - from the approved proposal.

Part C:
> **Initial Literature Review**
> You should **summarise all** the key literature sources of information discovered so far**. All sources should be reviewed, analysed, compared and evaluated**. Note. *This is a **summary** of the key literature sources, you should NOT simply cut and paste the contents of the sources found so far.*
> The review should include the relevance of each source to the project. In particular you should explain how the literature will be used to answer the academic question and provide a solution to the aims of the project.
> All sources should be referenced as per the University guidelines on Harvard Referencing.

Part D:
> **A. Project Progress (PR1)**
> Interim Deliverables and Results - What have you achieved so far? What progress has been made? Reference should be made to the aims and objectives of the project.
> **B. Project Progress (PR2)**
> Interim Deliverables and Results - What have you achieved so far? What progress has been made? Reference should be made to the aims and objectives of the project.
> **C. Planned Progress**
> Planned final Deliverables and Results - What further deliverables are you planning on producing, how will these be achieved? Highlight/discuss key stages and milestones from the project plan.

Part E:
> **Project Plan**
> Include a GANTT chart, showing tasks and milestones of the project. Should clearly show the tasks completed/milestones met to date, and those yet to come.
> Include a summary to accompany the GANTT chart, highlighting key stages/topics/etc.
